**Safeway Stores to Pay \$9.87 Million Settlement for
Environmental Violations**

(Woodland, CA) - January 5, 2015 Yolo County District Attorney Jeff Reisig together with 41 other California District Attorneys and two City Attorneys announced today that Alameda County Superior Court Judge Wynne S. Carvill has approved a Stipulated Final Judgment and Permanent Injunction against Pleasanton-based Safeway Inc. The settlement resolves allegations that more than 500 Safeway stores and distribution centers, including its other brands, Vons, Pavilions and Pak 'n Save, violated California laws for the safe storage, handling and disposal of hazardous and pharmaceutical waste generated from spills and customer returns of hazardous products.

The investigation into Safeway's practices began after discovery of improper shipments of hazardous and pharmaceutical waste to Safeway's distribution centers from their stores. The investigation revealed that Safeway was also routinely and systematically sending hazardous and pharmaceutical wastes to local area landfills not equipped to receive such waste. Upon being notified by prosecutors of the widespread issues, Safeway worked cooperatively to remedy the issue, enhance its environmental compliance program and train its employees to properly handle such waste.

Pursuant to the terms of the Final Judgment and Permanent Injunction, California Safeway stores have adopted new policies and procedures designed to eliminate the improper disposal of retail hazardous waste products and pharmaceutical waste into store trash bins for eventual disposal into local landfills. In addition, the corporation must pay \$9.87 million in civil penalties, costs and supplemental environmental projects. Under the terms of the settlement, Safeway must also continue its First Assistant Store Manager Program designed to address environmental compliance at the store level and conduct annual store audits.

District Attorney Reisig stated: "The collaboration of the Yolo County District Attorney's Office, the California Department of Toxic Substance Control, local Environmental Health Departments and other prosecutorial agencies is essential in matters such as these that affect the quality of life for our local citizens and those throughout California. Ultimately, our common goal is to ensure that environmental laws are complied with by all so that the best of California is preserved for future generations."
